Location: Pune, India

---

**Professional Summary**

Backend-focused Software Engineer with 2+ years of experience in designing RESTful APIs and building scalable server-side applications using Java and Spring Boot. Strong understanding of relational databases and version control systems. Passionate about writing clean, maintainable code and improving system performance.

---

**Technical Skills****Languages:**

Java, Python

**Frameworks & Tools:**

Spring Boot, REST APIs, Hibernate

**Database:**

MySQL

**Version Control:**

Git

**Other Tools:**

Postman, Maven

---

**Experience****Software Developer – XYZ Technologies**

June 2023 – Present

- Developed RESTful APIs using Spring Boot.
  - Integrated MySQL database for backend data storage.
  - Implemented authentication logic for internal tools.
  - Collaborated using Git and Agile methodologies.
  - Improved API response time by 25%.
- 

**Projects****Inventory Management System**

- Built backend services using Spring Boot.

- Designed database schema in MySQL.
- Created REST APIs for CRUD operations.

---

## **Education**

Bachelor of Engineering in Computer Science  
Savitribai Phule Pune University
